ACCREDITED BY  APMG-International™

Course Duration

Three day public training course.

Course Overview

The course empowers delegates with:

- Knowledge and understanding of the COBIT5 guidance
- Understanding of Governance and Management of Enterprise IT
- Knowledge to create awareness with their business executives and senior IT Management

Course Objectives

The course provides knowledge of the key principles and concepts of COBIT5, with focus on the following areas:

- The major drivers for development of COBIT5.
- The business benefits of using COBIT5
- The COBIT5 Product Architecture.
- The five (5) key principles of COBIT5.
- How COBIT5 enables IT to be governed and managed in a holistic manner for the entire enterprise.
- How the COBIT5 processes and the Process Reference Model (PRM) help guide the creation of the five (5) Principles and the seven (7) Governance and Management Enablers.
- The basic concepts for the implementation of COBIT5
- The basic concepts of the new Process Assessment Model (PAM)
- The COBIT5 guides and how they interrelate

Course Format

The course is presented in an instructor led classroom style. A combination of lectures, group discussions, and sample exam questions will be used.

Who should attend?

This course is for business managers, chief executives, IT/IS auditors, internal auditors, information security practitioners; IT consultants, IT/IS managers requiring an insight into the enterprise governance of IT and eventual certification as COBIT implementer or assessor.

Professional Qualification

The COBIT5 Foundation Certificate, which is a pre-requisite for both the COBIT5 Implementation certificate and the COBIT5 Assessor certificate.

Structure

The course is primarily lectured based, with assignments to reinforce the key learning topics, and largely based on the COBIT5 A Business Framework for the Governance and Management of Enterprise IT.

Content

Overview and key features of COBIT5

- The major drivers for the development of COBIT5.
- The business benefits of using COBIT5.
- The COBIT5 Product Architecture.

The COBIT5 Principles

- Meeting stakeholder needs
- Covering the enterprise end-to-end
- Applying a single integrated framework
- Enabling a holistic approach
- Separating governance from management

The 7 Enablers

- Principles, policies and frameworks
- Processes
- Organizational structures
- Culture, ethics and behaviour
- Information
- Services, applications and infrastructure
- People, skills and competencies

The 7 steps of implementation, covering the three areas of:

- Programme management
- Continual improvement
- Change enablement

Process Capability Assessment

- The reasons for assessment
- The related standard and purpose of the COBIT5 assessment guides
- The levels of assessment

Documentation

Comprehensive course documentation is provided. It is recommended that the delegates download the COBIT5 Business Framework guide, which is freely available as a PDF from ISACA
